PROFESSIONAL SUMMARY

Driven and detail-oriented Computer Science student with strong skills in frontend web development and software design. Experienced in building practical, user-focused applications including an AI-powered interview coaching platform and a developer productivity dashboard. Also possesses foundational knowledge in cybersecurity through academic projects focused on system monitoring and protection. Passionate about solving real-world problems through clean, efficient, and scalable solutions.

TECHNICAL SKILLS

- **Programming Languages:** little JavaScript and more of Python
- **Web Technologies:** HTML, CSS, JavaScript
- **Frameworks & Tools:** Flask, SQLAlchemy
- **Core Concepts:** Data Structures & Algorithms, Object-Oriented Programming, REST APIs
- **Tools & Platforms:** Git, GitHub, Netlify
- **Other Skills:** UI/UX Design, Debugging, LocalStorage Implementation, Problem Solving, Basic Cybersecurity Concepts

PROJECTS

CS Interview Coach

HTML, CSS, JavaScript

- Developed a realistic interview preparation platform simulating technical interview environments.
- Implemented a structured question bank with searchable sections and expected answers.
- Designed role-based interview paths (frontend, backend, full-stack, graduate).
- Built responsive UI to enhance usability across devices.

DevTrack Lite — Developer Productivity Dashboard

HTML, CSS, JavaScript

- Built a professional productivity dashboard for developers to manage tasks, track learning progress, and log debugging experiences.
- Implemented persistent data storage using browser localStorage.
- Integrated features such as focus timer, analytics dashboard, weekly goals, and structured workflow tools.
- Designed a modern, user-friendly interface with emphasis on productivity and usability.

System Activity Monitoring Tool (Academic Project)

Python

- Developed a system monitoring application as part of a systems protection and cybersecurity course.
- Implemented input logging techniques within a controlled and ethical academic environment.

- Explored system security concepts including user activity tracking, data handling, and risk awareness.
- Gained practical understanding of cybersecurity principles and responsible software usage.

EDUCATION

Bachelor of Science in Computer Science

(Midlands State University)

(Expected Graduation: 2029)

EXPERIENCE

- Developed multiple real-world web applications focusing on usability, performance, and clean design
- Applied strong debugging and problem-solving skills in building functional software systems
- Gained practical exposure to cybersecurity concepts through academic projects

STRENGTHS

- Strong problem-solving and analytical thinking
- Fast learner with ability to adapt to new technologies
- Attention to detail in UI/UX design
- Self-motivated and disciplined

INTERESTS

- Software Development
- Web Application Design
- Cybersecurity
- Developer Productivity Tools
