PROMINANCE FUNGURAYI

Software developer

UI/UX Engineer

Cyber security enthusiast

PROFILE

A Computer Science student at Midlands State University. I specialize in designing user-friendly systems. My passion lies at the intersection of security and development. My goal is to grow into a full-stack developer and digital strategist, delivering high-quality, autonomous platforms that make a real difference.

Interests: AI and cybersecurity, especially building secure systems.

EXPERIENCE

Started coding journey

2022-2023

Began with HTML, CSS, and Python fundamentals. Built first projects and discovered a deep passion for software development and system design.

Freelance Web developer

2024

Built websites and web apps for local clients. Delivered responsive, user-friendly platforms and learned how to manage full project lifestyles from brief to deployment.

Full stack developer

2024-NOW

Developed and deployed multiple secure web applications including my Trading Journal. Also started on Flask and database architecture.

SKILLS

- Programming with python
- Database Design
- UI design
- System security
- Project management
- Problem solving
- Communication skills

EDUCATION

High School

Completed secondary education with a focus on Mathematics and Sciences at St Bernard's High in Bulawayo, building a strong foundation for university-level Computer Science studies.

University

Currently Studying Computer Science at the Midlands State University.
